

# 5-1. Regional Projects

## Whatcom Council of Governments regional projects list, 2019 – 2040

For the development of the regional projects list, WCOG consulted with jurisdictions to identify projects that 1) advance one or more of the region’s transportation goals, 2) provide regional benefit that is identified in the [Whatcom Regionally Significant System](#) and 3) are fiscally constrained. Fiscal constraint refers to project or program costs within reasonably-expected revenues over the planning period.

The primary sources of the projects contained in this list are comprehensive plans, transportation improvement programs, state facility programming, transit planning, and other qualifying regional programs.

The following projects table contains the following: agency responsible for the project, current project label (current title), estimated location, brief description, year of implementation cost (in thousands of dollars), and the year of completion. The Regional Projects can be viewed online [Whatcommobility.org](#).
